MANISH GOWDA T

Bengaluru, Karnataka | tgowda4707@gmail.com | +91 9483724707 | linkedin.com/in/manish-gowda-t | github.com/ManishGowdaT

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in Python, Flask, FastAPI, and AI-powered application development. Interested in cybersecurity, secure coding, and application security, with a strong focus on building reliable and user-friendly software. Currently developing practical knowledge of cybersecurity principles while continuing to strengthen skills in scalable web applications and data-driven solutions.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, SQL, HTML5, CSS3

Backend: Flask, FastAPI,RESTful APIs, SQLAlchemy, OOPs,
DBMS

Frontend: React.js, Next.js, Bootstrap

Database: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: Git, GitHub, VS Code, XAMPP, Ubuntu, Linux

ML & Data: XGBoost, scikit-learn, pandas, NumPy, Matplotlib, data preprocessing, exploratory data analysis

INTERNSHIP

Developer Intern | Ellipsonic Currently pursuing

- Contributing to responsive web interfaces using React.js and Next.js, with attention to usability, browser performance, caching, and clean component design.
- Supporting backend development with Python and Django REST Framework by building REST APIs, working with databases, and applying secure authentication and data validation.
- Integrating machine learning models, LLMs, and external AI APIs into backend workflows while handling logging, rate limits, and asynchronous processing.
- Assisting with data collection, cleaning, preprocessing, and exploratory analysis, while collaborating with developers, designers, and project teams to document and deliver practical solutions.

PROJECTS

OptionAlgo | Algorithmic Trading & Options Research Platform *In development*

React, TypeScript, Node.js, Express, Python, FastAPI, MongoDB, Angel One SmartAPI

- Built a multi-user trading platform integrating Angel One market data, interactive charts and strategy monitoring; implemented account-isolated sessions, encrypted credential storage and validated REST APIs.
- Developed Bull Put/Bear Call spread research with multi-stock scans, decimal-based payoff and volatility analytics; added ranked results, cancellable background jobs, failure isolation and automated cross-service regression tests.

TECHNICAL PROJECTS

Smart Traffic Management Barrier System | Team QuantaFlow *SIH 2025*

AI, IoT, Computer Vision, Embedded Systems

- Architected an AI-driven adaptive lane management system integrating IoT sensors and CCTV analytics for dynamic urban traffic optimization without human intervention
- Developed automated lane reversal and emergency ambulance corridor logic — core architecture currently under IP evaluation; led Team QuantaFlow at SIH 2025
- This Project was selected for IDE Bootcamp 2026 and SIH 2026(College level)

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** Data Analytics – Microsoft | Java Fundamentals – Oracle Academy | Fundamentals of DevOps – Infosys Springboard
- Selected – Smart India Hackathon 2025 (National Level) | 1st Place – UI/UX Design Competition, Atria Institute of Technology
- Selected – Entrepreneurship & Innovation IDE Boot Camp | 2× Selection (2024 & 2026)

EDUCATION

B.E. in Information Science & Engineering *2023 – 2026 (Pursuing)*

Atria Institute of Technology, Bengaluru | CGPA: 8.32

Pre-University – Science (PCMB) *2021 – 2023*

MS Ramaiah Pre-University College | 87.6%
